PBS Multi-Payment Processing

More and more businesses are finding it important to accept credit card payments from their customers. It can often mean the difference between closing a sale or losing it.

With the release of Passport Business Solutions™ Version 12.02, Passport Software Inc. is pleased to offer a new add-on, PBS Multi-Payment Processing. This gives your business the ability to process credit card payments directly from a new multi-payment screen in the following packages:

- PBS Order Entry and Invoicing
- PBS Accounts Receivable Invoicing
- PBS Accounts Receivable Cash Receipts

This is in addition to the PBS POS ticket entry screen which has been available for some time.

This fully-integrated credit card payment solution using XCharge’s PCI compliant application has many benefits such as:

- saves you time
- improves and secures your credit card payment records
- improves cash flow
- enhances customer service
- provides you a secure, PCI compliant gateway.

When you sign up with X-Charge you can be assured that your data and credit card transactions are safe and secure and that X-Charge provides you with competitive industry rates.

How do I get started?

The first step is to call Accelerated Payment Technologies, the developers of X-Charge, at 800.637.8268 and go through the application and rate quote process. You should also tell the Accelerated Representative that you are using Passport Business Solutions and identify your Passport Partner.

Next, contact your Passport Partner and let him/her know that you are interested in being able to safely and securely accept credit card payments through PBS Accounts Receivable and/or Order Entry.

Due to on-going changes and updates in the PCI PA-DSS standards, there will be an annual fee of $100 per client install, and you will be automatically notified by the PBS Multi-Payment software 30 days prior to your expiration date, along with your PUP expiration date, and also given a 30 day grace period after the expiration date. After 60 days of warnings the credit card processing function will be automatically turned off if not renewed.

Once approved and the PBS Multi-Payment Processing add-on is installed you are ready to go!

PBS users who use the features currently available in Accounts Receivable and/or Order Entry for cash or check payments only, are not required to purchase the PBS Multi-Payment Processing add-on product.
